Instructor: Han Pu**Office: BRK 309****Email: hpu@rice.edu****Office Hours:** Tu. 1:30~2:30pm; Fri. 2:00~3:30pm; or by email appointment**Tutorial sessions** (TA: Shah Saad Alam):

GRB W211, Mon. 2:00~3:30pm

Lab Instructor: Stan Dodds**Office: HRZ 215****Email: dodds@rice.edu**

COURSE OBJECTIVES AND LEARNING OUTCOMES

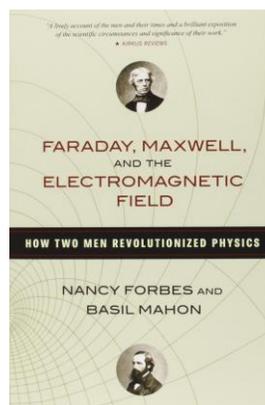

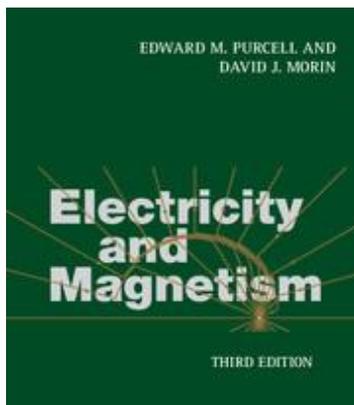

In Phys112, we will study the theory of electromagnetism. The electromagnetic force is the force which binds electrons to protons to form atoms, and atoms to atoms to form molecules and solids. This is the fundamental force for chemistry and biology, and one of the most important forces in our lives. As we will see, there are a great variety of electromagnetic phenomena, but the underlying theory can be cast into just four equations. In this course we will take on a journey to learn these four equations. Phys112 will parallel Phys102, but will be more theoretical and mathematical, and the work load will probably be somewhat higher. The Phys112 lab will also be run separately. It will include 7 experiments. Dr. Stan Dodds is in charge of the lab.

Topic Learning Outcomes: By the end of the course, students will

- (1) be able to understand the basic laws of electromagnetism
- (2) be familiar with vector calculus
- (3) be able to understand the connection between electricity and magnetism
- (4) be able to understand Maxwell's equation in both differential and integral forms.

REQUIRED TEXTS AND MATERIALS

REQUIRED TEXTBOOK *Electricity and Magnetism (3rd edition)*, Purcell and Morin, Cambridge University Press, 2013.

AN INTERESTING READ *Faraday, Maxwell, and the Electromagnetic Field*, Forbes and Mahon, Prometheus Books, 2014

EXAMS AND PAPERS

Two midterm exams (7~9pm, Wed. Feb. 13th and Wed. March 20th), and one final exam.

GRADE POLICIES

I plan to assign a homework set each week, usually due at the beginning of class one week later. Homework sets will be distributed in class but they will also be available from the course web page.

Homework Policy: Homework must be done under the Honor System. You are encouraged to discuss the homework problems with your PHYS 112 classmates and with the instructor, but you must write up your solutions *independently*. Of course, you must not copy from anyone else's solutions. The homework papers you hand in should be the result of your own thought and effort. Homework can be turned in during class or to the box labeled 'Physics111/112 Homework' located on the 2nd floor of Brockman Hall.

Late Policy: Late homework will be counted off 20% for each day late, unless excused by illness or some other valid reason. Late homework must be delivered to the instructor for that problem set and the student must write "Late" and the date and time on the front page.

Grading Weights:	Lab:	15%
	Homework:	30%
	Midterm Exam 1:	15%
	Midterm Exam 2:	15%
	Final Exam:	25%

RICE HONOR CODE

In this course, all students will be held to the standards of the Rice Honor Code, a code that you pledged to honor when you matriculated at this institution. If you are unfamiliar with the details of this code and how it is administered, you should consult the Honor System Handbook at <http://honor.rice.edu/honor-system-handbook/>. This handbook outlines the University's expectations for the integrity of your academic work, the procedures for resolving alleged violations of those expectations, and the rights and responsibilities of students and faculty members throughout the process.

DISABILITY SUPPORT SERVICES

If you have a documented disability or other condition that may affect academic performance you should: 1) make sure this documentation is on file with Disability Support Services (Allen Center, Room 111 / adarice@rice.edu / x5841) to determine the accommodations you need; and 2) talk with me to discuss your accommodation needs.

SYLLABUS CHANGE POLICY

This syllabus is only a guide for the course and is subject to change with advanced notice.
